PROJECTS MADE

Web page
A completely functional main page, using JavaScript, BOOTSTRAP 4, HTML5, CSS3, JQuery, PHP and SQL, the main characteristics of this page are the carousel, made with Bootstrap,the fully functional php form, which data, when sent, is stored at the hosting database to be consulted by the web developer, and the page's responsive design, that allows a correct display in any device, whether small or large.
Can be found at:
https://jorgemendi.000webhostapp.com

Wordpress Portfolio
Portfolio created using WordPress technology, form also 100% functional.
Can be found at:
https://albertmns.wordpress.com/

Ajax "social network"
A page that allows the user to upload a photo or write a thought, and be displayed in the DOM, as the web App is using ajax, it is not necessary to reload the page to be visible. Archives are stored at the host server.
can be found at:
https://jorgemendi.000webhostapp.com/sclntwrk/index.html

Scholar project
Project made for school, using simple JavaScript,CSS and HTML to make mathematical operations and deploy results in the DOM.
Can be found at:
